EDUCATION

Nanyang Technological University — MSc, Business Analytics

Aug 2026 – Present

- Key courses: Analytics Strategy; AI & Big Data in Business; Strategies for Digital Transformation in Business

Beijing Jiaotong University — BBA, Business Administration

Sep 2022 – Jun 2026

- GPA 3.74 / 4.0
- Key courses: Python for Data Analysis, Business Statistics, Managerial Statistics, Market Research & Data Analysis, Strategic Management, Operations & Supply Chain Management

INTERNSHIP EXPERIENCE

ByteDance — User Growth | Business Analysis Intern

Jan 2025 – Feb 2025

- Owned quality monitoring and cleaning for 6 core tables (user behaviour, transaction records); built an AI-assisted QA workflow for missing-value detection, outlier flagging and date-format validation, lifting data usability from 92.5% to 99.2%.
- Built 12 Power BI dashboards — GMV trend heatmaps, product-rating boxplots, user-activity time-series — covering daily monitoring across the transaction, product and user workstreams.
- Through user-activity and conversion analysis, identified a conversion-rate peak at 20:00 running 63% above the daily average, providing the quantitative basis for optimising campaign scheduling.

L'Oréal (China) — Business Analysis Intern

Apr 2024 – Jun 2024

- Benchmarked Chando and Proya across product portfolio, pricing and promotional activity; consolidated 10+ competitor datasets (e-commerce sell-through, promotions) in Excel pivot tables to quantify relative strengths — delivering 3 market opportunities and several risk flags that were adopted into the Q3 category plan with written recognition from the department, and informed 3 major promotional campaigns.
- Researched CRM practices in the beauty industry — membership structure, repurchase behaviour and digital touchpoint deployment — authoring a ~20,000-character industry report with strategic recommendations.

Western Securities — Research Intern, Electronics & Semiconductors

Dec 2025 – Mar 2026

- Used LLM agents to decompose and consolidate 30+ expert interviews and site-visit notes, converting unstructured text into structured research conclusions at scale; deployed AI agents to pre-read filings and broker reports for automated first-pass screening.
- Built and maintained the core electronics industry database (global semiconductor sales, fab utilisation, key product pricing), updating 500+ data points under a standardised collection and refresh process.
- Supported in-depth semiconductor company reports (30–50 pages each), covering value-chain mapping and competitive landscape for foundry, foldable-display and AI-chip sub-sectors.

Roland Berger — Consulting Project Team, Intern

Nov 2025 – Feb 2026

- Designed a management diagnostic survey (strategy execution, organisational structure); processed 200+ valid responses with multi-dimensional cross-tabulation and AI-agent topic clustering of open-ended feedback, quantifying unstructured input into 5 core findings.
- On an automotive cross-industry M&A project, used AI research agents to map the robotics value chain and ran fundamental analysis on 10+ companies (patent counts, R&D intensity, supply-chain stability), contributing to a 15+ page market-entry deck.

ACADEMIC PROJECT

NTU AN6004 Data Management & Visualization — Music-Streaming Behaviour Analysis (MySQL + MongoDB)

Sep 2026

- Analysed ~11.5k relational rows and ~27.4k documents of music-streaming data (numerics stored as text, mixed timestamp formats, inconsistent cross-table identifiers), applying window functions, multi-level CTEs, REGEXP validation and four-table joins in MySQL for data-quality rule checking and monthly top-3 ranking, and MongoDB aggregation pipelines with ``$setWindowFields`` for year-over-year and distinct-count metrics.
- Quantified the systematic under-count from implicit type conversion via a controlled “raw vs cleansed” comparison, documenting analytical conventions and limitations in-code.

HONOURS & AWARDS

- 1st Prize, Shandong Province — 15th “Zhengda Cup” National Market Research & Analysis Competition (2025)
- Silver Award, Beijing Region — “Challenge Cup” National Entrepreneurship Plan Competition (2024)
- 1st Prize, University level — National E-Commerce “Innovation, Creativity & Entrepreneurship” Challenge (2023)
- Academic Excellence Scholarship (2nd Class), BJTU (2022–23, 2023–24)
- “Merit Student”, BJTU (2023)

SKILLS & CERTIFICATIONS

- Languages: Mandarin (native); English — IELTS 7.0, CET-6
- Programming & querying: Python (data cleaning and analysis), SQL / MySQL (window functions, CTEs, multi-table joins, REGEXP validation), MongoDB (aggregation pipelines), SPSS, Excel (pivot tables, functional modelling), vibe coding
- Analytics & visualisation: Power BI, Tableau
- AI applications: AI-assisted data QA (missing values, outliers, formats), LLM-agent topic clustering and root-cause attribution on unstructured text
- Methods: descriptive statistics and cross-tabulation, survey and scale analysis, user-behaviour and conversion analysis, competitor benchmarking, metric frameworks, data-quality monitoring
