EDUCATION

Nanyang Technological University — MSc, Business Analytics

Aug 2026 – Present

- Key courses: Analytics Strategy; AI & Big Data in Business; Strategies for Digital Transformation in Business

Beijing Jiaotong University — BBA, Business Administration

Sep 2022 – Jun 2026

- GPA 3.74 / 4.0
- Key courses: Python for Data Analysis, Business Statistics, Managerial Statistics, Market Research & Data Analysis, Strategic Management, Operations & Supply Chain Management

INTERNSHIP EXPERIENCE

Western Securities — Equity Research Intern, Electronics & Semiconductors

Dec 2025 – Mar 2026

- Built an “AI-first screening, human review” workflow: used AI agents to pre-read filings, broker reports and meeting minutes, sharply shortening the desk-research phase of each deep-dive report.
- Supported senior analysts on in-depth company research reports (30–50 pages each); independently owned value-chain mapping and competitive-landscape analysis for the foundry, foldable-display and AI-chip sub-sectors.
- Produced 30+ expert-network interview and site-visit notes, using LLM agents to decompose themes and consolidate views — turning unstructured conversation into reusable conclusions on capacity plans and technology-roadmap shifts.
- Built and maintained the team's core electronics database — global semiconductor sales, fab utilisation rates and key product pricing — updating 500+ data points to underpin ongoing sector tracking.

Roland Berger — Consulting Project Team, Intern

Nov 2025 – Feb 2026

Project 1 — Digital transformation strategy for a large state-owned enterprise

- Designed a management diagnostic survey covering strategy execution and organisational structure; processed 200+ valid responses with multi-dimensional cross-tabulation, and applied AI agents to cluster hundreds of open-ended comments into 5 core findings that formed the fact base for the diagnosis.
- Used LLM agents to extract, categorise and logic-check raw interview transcripts into 3 high-quality write-ups, and to refine deck structure; independently produced a 20-page client deck communicating findings through visual exhibits.

Project 2 — Cross-industry M&A analysis for a leading automotive OEM

- Researched China's robotics sector (humanoid-robotics focus) using Wind, expert networks and AI research agents, mapping upstream/downstream suppliers and competing technology paths.
- Ran fundamental analysis on 10+ robotics start-ups and category leaders across core patent counts, R&D intensity and supply-chain stability.

- Delivered a 15+ page market-entry recommendation deck — using AI to help distil sector logic and investment highlights — covering market size, competitive landscape and “AI + robotics” synergies, directly supporting the client's decision on a new business segment.

ByteDance — User Growth | Business Analysis Intern

Jan 2025 – Feb 2025

- Owned data-quality monitoring and cleaning for 6 core tables using an AI-assisted QA workflow (missing values, outliers, date formats), lifting data usability from 92.5% to 99.2%.
- Built 12 Power BI dashboards; identified a conversion-rate peak at 20:00 running 63% above the daily average, informing campaign scheduling.

L'Oréal (China) — Business Analysis Intern

Apr 2024 – Jun 2024

- Benchmarked Chando and Proya across portfolio, pricing and promotions; consolidated 10+ competitor datasets in Excel pivot tables, delivering 3 market opportunities and several risk flags adopted into the Q3 category plan.
- Researched beauty-industry CRM practices (membership structure, repurchase behaviour, digital touchpoints), authoring a ~20,000-character industry report with strategic recommendations.

HONOURS & AWARDS

- 1st Prize, Shandong Province — 15th “Zhengda Cup” National Market Research & Analysis Competition (2025)
- Silver Award, Beijing Region — “Challenge Cup” National Entrepreneurship Plan Competition (2024)
- 1st Prize, University level — National E-Commerce “Innovation, Creativity & Entrepreneurship” Challenge (2023)
- Academic Excellence Scholarship (2nd Class), BJTU (2022–23, 2023–24)
- “Merit Student”, BJTU (2023)

SKILLS & CERTIFICATIONS

- Languages: Mandarin (native); English — IELTS 7.0, CET-6
- Research tools: Wind, expert networks, AI research agents
- AI applications: LLM agents for pre-reading filings and broker reports, theme decomposition of expert-interview notes, clustering and root-cause attribution of open-ended survey feedback, and AI-assisted distillation of sector logic
- Programming & software: Python, SQL / MySQL (window functions, CTEs, multi-table joins, REGEXP validation), MongoDB (aggregation pipelines), SPSS, Excel, vibe coding
- Analytics & visualisation: Power BI, Tableau
