EDUCATION

Nanyang Technological University — MSc, Business Analytics

Aug 2026 – Present

- Key courses: Analytics Strategy; AI & Big Data in Business; Strategies for Digital Transformation in Business

Beijing Jiaotong University — BBA, Business Administration

Sep 2022 – Jun 2026

- GPA 3.74 / 4.0
- Key courses: Python for Data Analysis, Business Statistics, Managerial Statistics, Market Research & Data Analysis, Strategic Management, Operations & Supply Chain Management

INTERNSHIP EXPERIENCE

Roland Berger — Consulting Project Team, Intern

Nov 2025 – Feb 2026

Project 1 — Digital transformation strategy for a large state-owned enterprise

- Designed a management diagnostic survey covering strategy execution and organisational structure; processed 200+ valid responses through multi-dimensional cross-tabulation and AI-agent topic clustering, attributing recurring management issues and distilling 5 core findings that formed the fact base for the improvement plan.
- Used LLM agents to extract, categorise and logic-check raw interview transcripts into 3 high-quality write-ups, and to refine deck structure; independently produced a 20-page deck communicating findings to client management through visual exhibits.

Project 2 — Cross-industry M&A analysis for a leading automotive OEM

- Assessed entry into a new business area: researched China's robotics sector (humanoid-robotics focus) using Wind, expert networks and AI research agents to map the value chain and competing technology paths, and independently ran fundamental analysis on 10+ target companies across patent counts, R&D intensity and supply-chain stability.
- Delivered a 15+ page market-entry recommendation deck — using AI to help distil sector logic and investment highlights — covering market size, competitive landscape and "AI + robotics" synergies, directly supporting the client's decision on a new business segment.

Western Securities — Research Intern, Electronics & Semiconductors

Dec 2025 – Mar 2026

- Used AI agents to pre-read filings, broker reports and meeting minutes, and LLM agents to decompose 30+ expert interviews and site-visit notes into themes and consolidated views on capacity plans and technology-roadmap shifts.
- Contributed to in-depth semiconductor company reports (30–50 pages each), owning value-chain mapping and competitive-landscape analysis for the foundry, foldable-display and AI-chip sub-sectors — building commercial fluency in a highly technical industry at speed.

- Built and maintained the core electronics industry database (global semiconductor sales, fab utilisation rates, key product pricing), updating 500+ data points into a reusable sector-tracking mechanism.

ByteDance — User Growth | Business Analysis Intern

Jan 2025 – Feb 2025

- Owned quality monitoring and cleaning for 6 core tables (user behaviour, transaction records); built an AI-assisted QA workflow for missing-value detection, outlier flagging and date-format validation, lifting data usability from 92.5% to 99.2%.
- Built 12 Power BI dashboards — GMV trend heatmaps, product-rating boxplots, user-activity time-series — covering daily monitoring across the transaction, product and user workstreams.
- Through user-activity and conversion analysis, identified a conversion-rate peak at 20:00 running 63% above the daily average, providing the quantitative basis for optimising campaign scheduling.

L'Oréal (China) — Business Analysis Intern

Apr 2024 – Jun 2024

- Benchmarked Chando and Proya across product portfolio, pricing and promotional activity; consolidated 10+ competitor datasets (e-commerce sell-through, promotions) in Excel pivot tables to quantify relative strengths — delivering 3 market opportunities and several risk flags that were adopted into the Q3 category plan with written recognition from the department, and informed 3 major promotional campaigns.
- Researched CRM practices in the beauty industry — membership structure, repurchase behaviour and digital touchpoint deployment — authoring a ~20,000-character industry report with strategic recommendations.

HONOURS & AWARDS

- 1st Prize, Shandong Province — 15th “Zhengda Cup” National Market Research & Analysis Competition (2025)
- Silver Award, Beijing Region — “Challenge Cup” National Entrepreneurship Plan Competition (2024)
- 1st Prize, University level — National E-Commerce “Innovation, Creativity & Entrepreneurship” Challenge (2023)
- Academic Excellence Scholarship (2nd Class), BJTU (2022–23, 2023–24)
- “Merit Student”, BJTU (2023)

SKILLS & CERTIFICATIONS

- Languages: Mandarin (native); English — IELTS 7.0, CET-6
- AI applications: AI / LLM agents for clustering and root-cause attribution of survey feedback, interview synthesis, industry pre-reading and deck structuring — consolidated into a personal “AI first pass, human review” workflow
- Programming & software: Python, SQL / MySQL (window functions, CTEs, multi-table joins, REGEXP validation), MongoDB (aggregation pipelines), SPSS, Excel, vibe coding
- Analytics & visualisation: Power BI, Tableau, Wind
